TITLE : DOOR MIRROR COMPOSITE DEVICE  
WITH ILLUMINATION

BEST AVAILABLE COPY

ABSTRACT : PROBLEM TO BE SOLVED: To multi-functionally provide an illumination section on a door mirror.

SOLUTION: An illumination section 3 is provided at the lower section of a storage type motor-operated door mirror 2 fitted to a door 1, and the illumination direction can be changed. A lamp of the illumination section 3 is lighted as a foot lamp illuminating the foot position A near the entrance of the door 1 in the normal state, and it is interlocked with the gear position as a reverse lamp illuminating the rear position B at the time of reverse travel.
